

CAPABILITY STATEMENT

AUSSIE GOLD

Specialising in bulk delivery of 15lt and 19lt bottles of water for business, construction and the mining industry.

Established in 1994, Aussie Gold is 100% Australian family owned and operated, employing 20 staff.

Our drivers currently deliver to all of Central Queensland, covering an area of nearly 300,000sq kilometres with the ability to increase our coverage. With dedicated routes to supply

the mining industry and major projects within our state, we are known for our ease of ordering, reliability and promptness.

Aussie Gold Natural Spring Water is single origin water, extracted and bottled within our HACCP accredited bottling plant. Our aquifer and bottling plant are located on our family property 'Karingal Springs' on the slopes of Mt. Barmoya - north of the Capricorn Coast. We chose the aboriginal word 'Karingal' meaning Happy Camp as it reflected our family's values and traditions when we purchased the property 35 years ago.

CORE COMPETENCIES

- Spring Water Delivery 15lt / 19lt / 600ml/ 1.5lt
- Water Coolers
- Servicing and Maintenance
- Bulk delivery onsite
- 24 hour emergency contact
- Mine spec trucks and drivers

ACCREDITATION AND SUSTAINABILITY

Aussie Gold Natural Spring Water is:

- HACCP accredited, ensuring your continuing peace of mind with the quality of our product.
- Audited annually through external auditor Quasi.
- Compliant with Food Standards Australia New Zealand (FSANZ) requirements for water quality testing, and we continually assess and implement global best practices.
- Sustainable - In 2007 we undertook an externally monitored water extraction assessment to determine the sustainable yield and any potential environmental impacts upon our aquifer. These results prove our long term sustainability by indicating a potential extraction increase of 200% and negated any environmental impacts from our processes.
- Compliant with Food Act 2006
- Compliant with Livingstone Shire Council – consent to operate a bottling factory
- Compliant with Livingstone Shire Council – Food Premise Inspection
- Compliant with Livingstone Shire Council – Food Business Licence No: FOOD-1034-2004 FOOD ACT 2006, SECTION 72(5)
- Standard 11 and Coal Board Medical

- John Holland Yeppen Flood Plains Road Project – Yeppen Flood Plains. ROCKHAMPTON QLD
- BMD – Carmichael Rail Line. Northwest of CLERMONT to the GALILEE BASIN
- Acciona Infrastructure Projects – Rookwood Weir. Southwest of ROCKHAMPTON QLD

PRODUCTS

Available in 15 litre and 19 litre polycarbonate bottles, cartons of 24 x 600ml and 1.5lt PET bottles.

Unlike surface water that is subject to pollution from the ground and air, requiring extensive treatment and chlorination to make it potable, Aussie Gold Natural Spring Water filters through volcanic rock over a long period, adding vital, natural minerals. These minerals give Aussie Gold Natural Spring Water its unique and refreshing taste.

The natural spring water collects in an ancient artesian aquifer, deep within two layers of fractured granite (volcanic) rock, where it is protected from external elements.

It is the natural way for water – untouched

Australian sourced Water Works coolers are built tough and durable. They come with a comprehensive 3 year parts and labour warranty. Water Works water coolers are trustworthy and dependable regardless of the application we install them in.

We have had these coolers on mine sites, on job sites and in factories; as well as corporate suites, executive foyers and receptions.

They are a good looking unit and, upon application, may be free of charge for major projects, large industry and mine sites.
